

## Iowa State University

Iowa Voter Survey  
September 13-17, 2019

---

### Overview

This report contains the results of a Civiqs survey of 1333 registered voters and 572 likely Democratic Caucus attendees in Iowa from September 13-17, 2019. The survey was conducted online, among selected members of the Civiqs research panel. Sampled individuals were emailed by Civiqs and responded using a personalized link to the survey at [civiqs.com](https://civiqs.com).

Likely Democratic Caucus attendees are respondents who answered that they would "Definitely" or "Probably" attend the Iowa Democratic Caucuses scheduled for February 2020, in question 1, and who identified themselves as Democrats or Independents on a previous Civiqs survey. An oversample of Democrats and Independents was selected to produce a larger number of likely caucus attendee respondents.

Demographic data, including self-reported party identification, was collected in previous Civiqs surveys. The survey results for registered voters are weighted by age, race, gender, education, party identification, and congressional district to be representative of the population of registered voters in Iowa. Likely caucus attendees were separately weighted by age, race, gender, education, party identification and congressional district. The general design effect due to weighting is 1.6 for registered voters and 1.6 for likely Democratic Caucus attendees, with the Democratic and Independent caucus attendee oversample. The survey has a margin of error of  $\pm 3.4\%$  for registered voters, and  $\pm 5.2\%$  for likely Democratic Caucus attendees, both at the 95% confidence level, accounting for the design effect. All survey results in this report are reported as percentages.
